JUNO SPEECH PATHOLOGY

How the process works

1 Initial consultation

You complete a case history form, then talk with Juno about your concerns, goals and funding options.

2 Assessment

Juno assesses your child’s communication. This may take more than one session.

3 Report

Juno explains the findings and recommendations, including whether therapy is needed and how it could be planned.

4 Intervention

Therapy works towards your child’s goals, in partnership with your family.

Progress is reviewed along the way, and goals are updated when needed.
